Carlos Garrote

Cloud & Infrastructure Engineer — DevOps / SRE trajectory
cgarrote92@gmail.com | cgarrote.cc | github.com/garrotini | linkedin.com/in/garrotini | Lisbon, Portugal

Summary

Emerging cloud/infrastructure engineer trained at 42 Lisboa with a C/C++ foundation. Builds and runs Linux-first infrastructure hands-on: a from-scratch container stack (Docker, Compose, NGINX, MariaDB, TLS), a self-hosted home lab, and a Hugo site deployed automatically by GitHub Actions to GitHub Pages. Currently extending this work with Terraform and Kubernetes, and evaluating AWS vs Azure as the first cloud target.

Skills

Infrastructure: Linux, Docker, Docker Compose, Networking, TLS/HTTPS, SSH, VPN (Tailscale), UFW (Firewall), Self-Hosting, Automation, Shell Scripting, Systemd
Languages: Python, C, C++, Bash
CI/CD: GitHub Actions, GitHub Pages, Hugo
Tools: Git, Make, Tmux, Vim, Rsync, Ollama, OpenCode
Currently learning: Terraform, Podman, Kubernetes, Cloud (evaluating AWS vs Azure)
Languages (spoken): Portuguese (native), English (fluent), Spanish (fluent)

Projects

inception — Containerized Web Infrastructure | *Docker, Compose, NGINX* github.com/garrotini/inception
- Built a from-scratch WordPress/NGINX/MariaDB stack for 42: 8 containers on custom Alpine Dockerfiles, including Redis, Adminer and Portainer
- Published only 443 (TLS 1.2/1.3); bridge-network DNS isolates the DB and credentials live in Docker secrets

cgarrote.cc — Automated Site Deployment | *Hugo, GitHub Actions, GitHub Pages* cgarrote.cc
- Push to main builds and deploys the Hugo site to GitHub Pages through GitHub Actions; custom domain with enforced HTTPS, Hugo version pinned so CI matches local

Home Lab — Containerized Self-Hosted Infrastructure | *Linux, Docker, Bash*
- Built and maintain a Linux server running 7 containerized services for daily use, backed up with rsync

set_deb12 — Automated Debian 12 Provisioning | *Bash, Docker, i3* github.com/garrotini/set_deb12
- One-pass setup provisions a fresh Debian 12 VM (Docker Engine, dotfiles), booting on 200–230MB RAM

minishell — Unix Shell in C | *C, POSIX* github.com/garrotini/minishell
- 42 school group project: built the lexer and parser of a simplified Bash clone — pipelines, redirections, heredocs, expansion, quoting, signals
- Working knowledge of process management, file descriptors and exit-code semantics, the core of Linux service behavior

Experience

Artistic Coordinator — "Creative Songwriting" 2022 – Present
Festival Internacional de Música de Setúbal *Setúbal*
- Coordinate a multi-school creative program end to end: composed and arranged 60+ songs with 3rd/4th grade students, and musically directed the final show at Fórum Luísa Todi
- Teach and manage the creative process for 250+ students yearly; deliver a deadline-driven production each edition, coordinating classes, teachers, production, staff, musicians and the venue

Music Teacher 2020 – 2025
Multiple schools and conservatoires: Sintra, Amadora, Coimbra *Portugal*
- Delivered music education across multiple schools, adapting methods to each group

Showband Bassist 2017 – 2019
Holland America Line *Europe, US, Caribbean*
- Performed live shows nightly with fixed start times and no retakes; held on-call safety duties and onboarded new production shows on 1–2 days' notice

Freelance Musician 2010 – Present
Double Bass, Electric Bass, Composition *Portugal, International*
- Self-employed contractor for 15+ years: negotiated bookings, logistics and scheduling across hundreds of gigs and international tours as sideman; composed and arranged for instrumental ensembles

Education

42 Lisboa Lisbon, Portugal
Software Engineering — Common Core *2024 – Present*
- C, C++, Linux/system administration, networking; group projects under peer evaluation

ESMAE — Instituto Politécnico do Porto Porto, Portugal
Bachelor of Music — Jazz Double Bass *2012 – 2016*
